PRESS RELEASE CONTENT FOR DECEMBER 2017
WIRELESS INDUCTION CHARGERS
COMPANY: LEGRAND AUSTRALIA

MEDIA RELEASE 2

Product: Wireless Induction Chargers

Charge wisely, charge wirelessly

Legrand Australia – the name synonymous with innovation in charging technology: from being the **first** to introduce 4.8A charging capacity, to the Type C charger, and now, with the introduction of their latest creation, wireless chargers.

<https://www.youtube.com/watch?v=GnCeAU0k5jY&t=7s>

Wireless charging allows the user to charge their device without the need of a cable. Based on the principle of induction, it works by using electromagnetic fields from one device to create an electric current inside another. This technology brings total freedom and extra autonomy for the user: place the device on the charger and presto! You're good to go!

Whenever and wherever the user needs them, Legrand's wireless chargers enable total mobility for everyday living. At home or in the office, these devices can be installed anywhere. This also provides flexibility for the installer, who can select from the following options:

The wall-mount:

- 1A charging capacity
- Dual antennae
- Extra Type A USB port (2.4A)
- Compatible with all Excel Life and Arteor coverplates

The tabletop pad:

- 1A charging capacity
- Recessed design
- IK08 – IP44

The tamper-proof:

- 1A charging capacity
- Dual antennae
- IK08 – IP66

Suited for both residential and commercial environments, Legrand's wireless chargers use Qi technology. Qi (pronounced "chee") is the universal standard for the wireless charging of battery-operated devices. They are compatible with the latest Samsung and Apple smartphones, along with a [wide range](#) of other smart devices, which are equipped with a Qi-standard induction receiver.

This makes charging device extra convenient for the user, as multiple devices from different manufacturers with induction charging are compatible. Qi guarantees getting the best use out of technology and safety without any connection constraints.

Break through the constraints of cables and set your next project free! www.legrand.com.au
