
PRESS RELEASE

Spiecapag Australia obtains OFSC Accreditation

Brisbane, Australia – March 6, 2025 – Spiecapag Australia is proud to announce that it has successfully obtained accreditation from the Australian Government's Office of the Federal Safety Commissioner (OFSC). This prestigious certification recognises Spiecapag's unwavering commitment to maintaining the highest standards of workplace health and safety.

OFSC accreditation is a rigorous process that demonstrates an organisation's ability to implement, monitor, and continuously improve a best-practice Work Health and Safety Management System (WHSMS) across its projects. This achievement reflects Spiecapag's dedication to fostering a proactive safety culture and delivering complex projects to the highest safety standards.

"This achievement is a direct reflection of the dedication, professionalism, and tireless work of our people," said John Walsh, Managing Director of Spiecapag Australia. "From our frontline teams to our support staff, everyone played a vital role in strengthening our safety systems and culture. OFSC accreditation doesn't just recognise our systems on paper - it recognises the people who make safety happen every single day."

As a leading contractor specialising in the construction of large-scale pipelines, associated facilities, and Horizontal Directional Drilling (HDD), Spiecapag Australia achieving OFSC accreditation further strengthens its position as a trusted partner in delivering complex projects safely, efficiently, and sustainably.
